

PRACTITIONER BIOGRAPHY

Dr. Nicole Fender BDS MSc (GDC No. 68536)

I qualified in 1993 from Cardiff University. I worked in the hospital service and then in general practice whilst completing a Masters degree in Endodontics in 1998 at Manchester University.

Since 1998 I have dedicated my practice to the field of Endodontics and in 2001 I was recognised by the General Dental Council as a specialist in Endodontics.

I joined St. George's Dental Practice in 2000. Here, with the use of specialist equipment such as the operating microscope, I treat patients requiring endodontic treatment. I accept referrals for this treatment from my colleagues within the practice and from many other dental practices in the region.

I currently work 4 sessions a week at St. George's Dental Practice and also have a role as a part-time tutor at Manchester Dental Hospital.

I welcome new private patients from both within and outside the practice.
